SUMMARY

Frontend Developer with 4+ years of React experience specializing in platform UI/UX and performance for a data-driven SaaS product. 20+ years total experience across web development and design.

WORK EXPERIENCE

Speedeon Data *Frontend Developer* — Jul 2022 – Aug 2026

- Owned end-to-end frontend development of AudienceMaker, Speedeon's core data-audience platform, evolving its UI/UX and architecture over 4+ years.
- Led a full legacy-to-functional-components React refactor across the platform, including its most complex chart widgets, shipped incrementally alongside ongoing feature work.
- Designed and built a getcensus.com UI, a custom data-destination integration, from scratch after a third-party solution fell through — delivered on the original deadline.
- Reduced Explorer page-load API calls from 10+ to 3–4 and cut re-render cycles from 21 to 3, meaningfully improving platform responsiveness.
- Initiated Speedeon's first UI/UX design system in Figma, establishing shared components and design tokens adopted platform-wide.
- Built configurable match-level selection, data-integrity alerting, and admin configuration tooling used across the order and audience-building workflow.
- Created and managed the company's WordPress support knowledge base and corporate site; partnered with Marketing leadership on a Salesforce-to-HubSpot migration and email/campaign automation.

Medicom Health *Marketing Designer & Web Developer* — Jan 2015 – Jul 2022

- Developed/maintained corporate websites aligned with marketing goals (Wordpress, PHP, MySQL, custom plugin development).
- Created digital and print marketing materials, motion graphics, and video.
- Supported lead-generation and reporting strategy using Pardot, Salesforce, and other tools in the corporate martech stack.

Medicom Health *Senior Interactive Designer* — Jan 2001 – Jan 2015

- Designed and developed custom desktop software applications with rich user interfaces for major pharmaceutical and health organizations.
- Developed hand-held device companion applications and created 2D/3D medical animations for applications and published DVDs (Flash/Flex, .NET, C/C++).

ADC Telecommunications *Programmer & CG Specialist* — Jul 1996 – Jan 2001

- Spearheaded an interactive, contextual 3D product catalog and produced marketing, trade-show, and shareholder-meeting media (2D/3D animation, Flash, print).

SKILLS

Frontend: React, JavaScript, HTML/CSS, Performance Optimization

Design & Systems: Figma, Design Systems, UI/UX

Platform & Data: PostgreSQL/MySQL, REST/API Integration

Marketing Systems: HubSpot, Salesforce, Pardot, Campaign Automation

EDUCATION

Udemy Full Stack Developer (Java, SpringBoot, PostgreSQL, JS, CSS) | 2024

Zero To Mastery Academy Complete React Developer (Redux, Hooks, GraphQL) | 2022

Hennepin Technical College Graphic Design | 1988 – 1990
