Typography

HEADINGS

Top-level page and section headings as defined in Stylus.

Page Heading

h1
Uppercase page title in Montserrat 200 weight, blue, 1.6em.

THE QUICK BROWN FOX JUMPS OVER THE LAZY DOG.

font-weight: 200 · font-size: 1.6em · color: \$blue

Section Heading

h2
Uppercase section header in 500 weight, dark gray, 1.2em.

THE QUICK BROWN FOX JUMPS OVER THE LAZY DOG.

font-weight: 500 · font-size: 1.2em · color: \$dark-gray

VALUES & KPI TYPOGRAPHY

Numeric / key metric styles used in labeled rows and value displays.

Labeled Items Row

.labeled-items
Base container for label/value pairs, 1em font-size with uppercase labels.

TOTAL AUDIENCE

123,456 records

font-size: 1em · labels: 0.8em, 700, uppercase

Primary KPI

.labeled-item.primary label, .labeled-item.primary .value
Enlarged label and value for key metrics; 1.2em with increased line-height.

PRIMARY AUDIENCE

987,654 records

font-size: 1.2em · line-height: 1.4em · weight: 700 for .value.large

Value Sizes

.value, .value.medium, .value.large
Base, medium, and large value styles with dark-gray emphasis.

Base value – The quick brown fox.

Medium value – The quick brown fox.

Large value – The quick brown fox.

.value: 1em · .value.medium: 700 · .value.large: 1.2em & 700 · color: \$dark-gray

FORMS & HELPER TEXT

Labels, helper text, and error styles as defined in Stylus.

Form Label (BS Form)

.bs-form .form-label
Uppercase form label with 700 weight, 0.8em size, and blue color.

Email Address

font-weight: 700 · font-size: 0.8em · text-transform: uppercase · color: \$blue

Inline Form Label

.form-field label
Inline label with uppercase text and right padding.

FIRST NAME

text-transform: uppercase · padding-right: 1em

Error Text

.form-field-error
Error messages in red, 0.875em, capitalized.

Email Address Is Required

color: \$red · font-size: 0.875em · text-transform: capitalize

Regular Helper Text

.regular-font-size
Helper text using 1em italic with 600 weight.

The quick brown fox jumps over the lazy dog.

font-size: 1em · font-weight: 600 · font-style: italic

SELECTION MATCH LEVEL

Sticky header label styling for match-level UI.

Match Level Label

.selection-match-level .label
0.8em, 500 weight, capitalized label with line-height 2em.

Match Level: High

font-size: 0.8em · font-weight: 500 · text-transform: capitalize

TOOLTIP TEXT

On-hover tooltip block from `tooltip-onhover.styl`.

Tooltip Body

.tooltiptext
Centered tooltip content at 1.1em, white on black.

The quick brown fox jumps over the lazy dog.

font-size: 1.1em · color: \$white · background: \$black

LINKS & SUPPORT TEXT

Global link and support-link styles from Stylus.

Global Links

a, a.link-primary
Uppercase links in blue with pointer cursor.

DEFAULT LINK · PRIMARY LINK

color: \$blue · text-transform: uppercase

Support Link

.support-link
Bold support / help link for emphasis.

NEED HELP?

font-weight: bold !important

TABLE TEXT

Representative table typography based on your styled headings/cells.

Table Head + Body

table.styled
Uppercase headers at 0.8em, body cells at 0.9em dark gray.

COLUMN	VALUE	STATUS
Alpha	123,456	Active
Beta	78,910	Pending

ICON FONTS

Font Awesome and Bootstrap Icons with app text colors.

Font Awesome

i.fa-*
Icons used inline with text and with semantic colors.

 Info fa-solid fa-circle-info text-muted  Warning fa-solid fa-triangle-exclamation

Bootstrap Icons

i.bi-*
Bootstrap icons aligned to the same baseline as Montserrat.

 Info bi bi-info-circle text-muted  Help bi bi-question-circle

Tool-Tips

MODAL MESSAGE DIALOGS WINDOWS

Select Match Level ?

Selection Match Level

Match Levels are how you determine at what level your selection matches to your target audience.

- **Individual** requires a match on first name, last name, and address.
- **Household** requires a match on last name and address.
- **Address** requires a match at the address only.

There are currently a few versions being implemented different ways.

Some have a ‘?’ icon (meant to be for things directly linking to the support site - but not necessary to be different).

Some (most) have an ‘i’ icon.

Some require a click to open, some have a hover. Click is technically the most standard I have found, probably because less easy to have it close before you are done reading or clicking additional links.

Decisions:

Icon type (we do use “i” in other places that are not tool-tips).

Toggle to show/hide: hover or click (or both - with reason).

FILTERS ?

Building a Target Audience

Filters are how you define your target audience. AudienceMaker uses two filtering systems within the platform to build audiences: [simple filters](#) and [complex filters](#) .

 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Info Alert

For use on non-error but important information that needs to be displayed.

Insight/Suggestion Alert

Usually used in combination with other warnings or errors to advise on how to correct.

Warning Alert

Intended for non-blocking errors

Error Alert

Used for blocking errors that won't allow the user to proceed until corrected. Best UI/UX practice is to avoid red when possible - use sparingly.

Success Alert

Currently not used.
